EFFICIENT PRECONFIGURED SHIPPING CONTAINERS.

ISP2 PRECONFIGURED CASES

Designed for Euro Pallet standard 1200mm x 800mm, the ISP2 Case system can be cross-stacked to form a solid load and was designed to guarantee a 100% surface usage. Thanks to maximising the use of space, shipping costs will dramatically be reduced. The use of columnar ribs in the case walls can support a much taller pallet stack than corrugated boxes. This takes advantage of overhead cargo space that would otherwise be wasted. Handles on all ISP2 Cases will enhance the speed of deployment over conventional containers.
