

## ■ Mission

Contour Group is an international growing service group, which design, build, supply and maintain advanced and professional systems. The group exists of 4 individual companies, located in the Netherlands and Germany. With 180 employees we are one of the larger companies in NL in our branch. One of the companies is Contour Advanced Systems

Contour Advanced Systems is as chain manager. Able to deliver durable turn key solutions as well as individual quality products. It transfers knowledge of innovation into the best solution for it's customers, by an integrated 'design-build-maintain' process, based on 100 year experience.

Contour Advanced Systems acts in the marked as main- and subcontractor. Regarding our products we succeed to develop and deliver in accordance to the highest required standards. The strength of Contour Advanced Systems is to have all disciplines under one roof (one stop shop), to operate efficient and effective!
