About us

This Creating Safe Transport Solutions document gives a clear impression of all activities we can help you with.

Family business Vonk B.V.

In the early eighties father Teeuwis Vonk bought a small company with a large hand lantern as the only product. In 1987, due to growing activities, son and current owner Ernst joined the company and added a quick coupling system for garden hoses to the range. Two years later Vonk B.V. came into contact with Pelican Products, from whom they were given the opportunity to distribute their products. They worked hard, father and son, and soon discovered that adding extra possibilities to the existing products turned out successful and very much valued by the customers. Now, Vonk B.V. is a growing company with a wide range of loyal relations and six employees, who passionately help their relations towards the best solution.

The team consists of:

Ernst Vonk - CEO

Jacqueline Vonk - COO

Mark Neeleman - Sales

Matthijs Heijndijk - Marketing

Bernt Vonk - Logistics

Yrana Breel - Sales

Of course we all look forward to embrace your needs and help you out with your wishes.
