worldwide packing and storing*

# Cost-effective Packages for Transportation and Storage

## Profitability through efficient one-way packaging solutions

Foldable plywood boxes are an efficient way to reduce freight costs. They are often used in air freight because of their light weight. Despite being light and compact, plywood boxes are hard-wearing and recyclable products. Savopak plywood boxes are always tailored for your product and means.

### Just On-Steel boxes

The Just On-Steel boxes have a sleeve with hot galvanized metal profiles in the corners that are machine compressed to the sleeve. Metal profiles of lid and bottom work as a counterpart for locking tongues. The locking tongues on the top and bottom of the sleeve make assembling and closing the box very convenient.

The Just On-Steel boxes are available in three different structures:

- **S-pak 3** - fast and easy. One-piece foldable sleeve, bottom and lid.
- **S-pak U4 (L4)** - just right for big products. Two-piece foldable L-form sleeve or alternatively sleeve with one loose side illustrating U-form, bottom and lid.
- **S-pak 6** - for most unwieldy products. Four-piece sleeve (all sides loose), bottom and lid.

### Just On-Wood boxes

The Just On-Wood boxes are constructed from one-piece foldable sleeve. The lid and bottom have wooden lists and the box is closed by strapping, nailing or screwing.

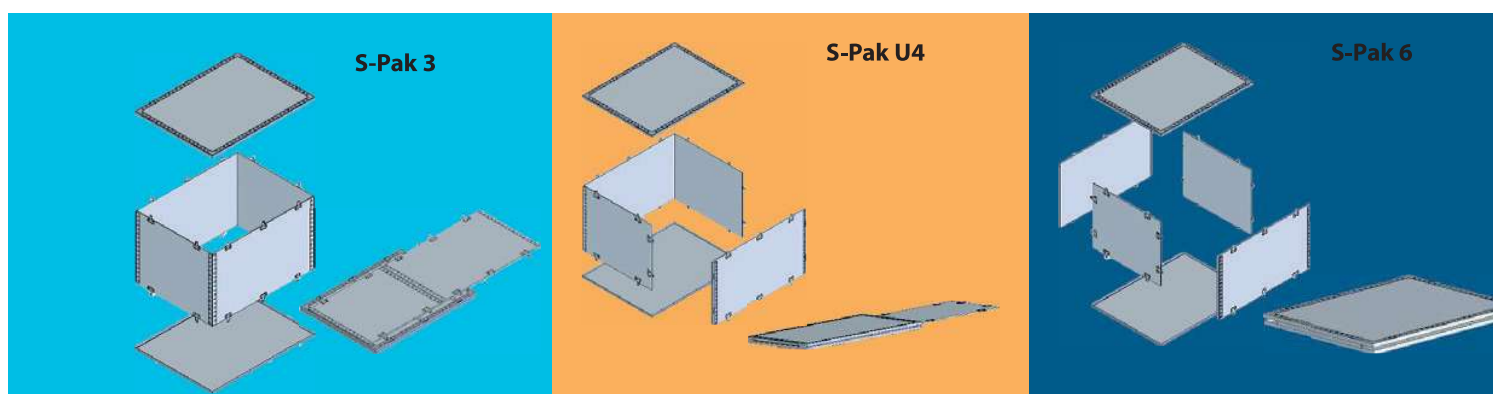

The Just On-Wood boxes are typically constructed of three parts:

- **W-pak 3** - One-piece foldable sleeve, bottom and lid.

### UN Packaging

The UN packagings of our selection meet the requirements on UN approval concerning transport packagings of the types 4D or 4 DV for dangerous goods. The package can, thus, be used for transport over land, rail, sea, and air internationally.

The certified packagings may be used as external packaging for materials of packaging groups I, II ja III. The dangerous goods being packed can be various kinds of solid or liquid goods.

## Cost-effective packing with returnable plywood containers

### Returnable plywood containers

The foldable and hard-wearing S-Reco returnable plywood containers are an extremely efficient solution to reduce the costs in regular goods traffic between production units.

The S-Reco containers are always sized according to your product and your needs.

#### S-Reco Light container

The S-Reco Light containers are used in all modes of transportation for transporting e.g. vehicle components, electronic devices, chemicals, etc.

- Folding sleeve, bottom and lid
- Compact to store and transport when folded - sleeve can be placed between lid and bottom
- Folded set is 5 cm high

#### S-Reco Robust container

The extra sturdy S-Reco Robust containers are used as well in all modes of transportation of extremely heavy components and devices.

- Folding sleeve, bottom pallet with fixed collar, lid
- Compact to store and transport when folded - sleeve is placed inside the fixed collar

*S-Reco Robust*

### Why to choose S-Reco?

- Easy to handle - no extra tools needed
- Cost-effective - saves transportation and storage space while folded
- Long-term solution - can be used over and over again

## Hard-wearing and multipurpose plywood boxes and cases

Plywood boxes and cases with a fixed structure lend themselves well to products needing a hard-wearing package for transportation or storage.

### S-Box Special

S-Box Specials are often used for storage or transportation of highly sensitive products, for instance. The visual appearance of S-Box Specials can be tailored to fit your company's visual needs using paint, printings, latches and handles, etc.

S-Box Specials can be accessorised with inner packages: shelves, lockers, paddings and foams.

### S-Case

For storage and transportation of smaller sensitive products we recommend the S-Case. The S-Case can also be tailored in terms of size, appearance and accessories.

Plywood boxes and cases are

- light weight
- durable
- stackable
- custom size
- custom look

## Multipurpose plywood boxes suit for all kinds of packing

### S-Box Tool

The S-Box Tool boxes with fixed structures have been designed mainly for storage purposes. These storing boxes are fabricated using plywood and supported with hot galvanized metal profiles, which makes them very durable also in heavy use. The S-Box Tool boxes are also very light-weight.

*S-Box Tool*

### Stock selection

**S-Box Tool 21** - Includes fixed compartment in lid and loose inner box  
Measurements: outside 1000 x 540 x 520 mm, inside 950 x 490 x 490 mm

**S-Box Tool 22** - Includes fixed compartment in lid and loose inner box  
Measurements: outside 1000 x 400 x 425 mm, inside 950 x 350 x 395 mm

**S-Box Tool 23** - Includes fixed compartment in lid and loose inner box  
Measurements: outside 800 x 400 x 425 mm, inside 750 x 350 x 395 mm

**S-Box Tool 24** - Includes loose inner box  
Measurements: outside 600 x 330 x 325 mm, inside 550 x 280 x 295 mm

**S-Box Tool 25** - Handle only in lid  
Measurements: outside 670 x 270 x 250 mm, inside 620 x 220 x 220 mm

### Extremely convenient

- Lid with metal hinges
- Handles on short sides
- S-Box Tool 24: handle also on lid
- S-Box Tool 25: handle only on lid
- Handy latch
- Stackable
- Lacquered
