SAVOPAK

VUODESTA 1969 - VUODESTA 1969 - VUODESTA 1969 -

Industrial transport and storage packaging for demanding use – since 1969.

Finnish manufacturer of wood and plywood packaging. In-house production, reliable deliveries.

ISO 9001:2015 – quality management standard

ISO 14001:2015 – environmental management standard

4 production sites in Varkaus and Rantasalmi

ISPM 15 standard for international wood packaging

Wood and plywood packaging **since 1969**

In-House Production

We manage the entire process from design to manufacturing. Consistent quality, reliable deliveries.

Experience & Expertise

Decades of industrial know-how. Professionals who understand materials and real-world use.

Flexibility & Support

We respond quickly and can handle even small batches and special demands smoothly.

REUSABLE PACKAGING

Foldable and fixed packaging for transport and storage. Our durable, custom-made products are designed for long-term, continuous use.

S-RECO LIGHT

Lightweight and durable for general use.

S-RECO ROBUST

Reinforced structure for heavy-duty industrial transport.

S-RECO MODULE

Modular and stackable for storage and circulation.

EXPORT PACKAGING

Plywood and wooden packaging suitable for both export and domestic transport. We select the package structure and materials according to the product being packed and the chosen mode of transport.

S-PAK 3

Fast and easy – one-part foldable sleeve, bottom and lid.

S-PAK U4

An excellent option for large products – two-part sleeve in U or L shape, bottom and lid.

CUSTOM SPECIAL PACKAGING

For decades, we have worked together with our customers to develop packaging solutions that reduce packaging, transport, and storage costs.

Contact us, and we will tailor a packaging solution that fits your product.

< PRODUCTS>

WOODEN PACKAGING

Fixed-structure packaging and bases for transport and storage needs. We tailor our durable products for demanding, long-term use.

Savopak supports its customers throughout the entire supply chain

Packaging Design

We tailor the packaging solution to your product's dimensions, weight, and transport con-ditions. The process includes technical design, 3D modelling, and prototype manufacturing when needed.

Storage and Packing

We can maintain a call-off stock for your products. Your goods are packed to meet your requirements for packing units, packing materials and markings.

Equipment and Personalisation

Our packaging solutions can be equipped with various accessories that improve handling, support and protect the packed product, and give the packaging a finished look.

Cerfications and Testing

Our packaging meets international transport and safety standards. We also take care of the UN-testing and approval process on your behalf.

Let's design the right packaging solution together.
